

# LILIET DE LA CARIDAD GONZALEZ POLANCO

## Quality Engineering Manager | QA Strategy | AI-Enabled Delivery Systems

Lima, Peru (UTC-5 · Remote · US-hours overlap) · +51 944 537 419 · [liliet.polanco.peru@gmail.com](mailto:liliet.polanco.peru@gmail.com)

Portfolio: [erzascarlettitalia.github.io/portfolio](https://erzascarlettitalia.github.io/portfolio) · LinkedIn: [linkedin.com/in/lilypolanco](https://linkedin.com/in/lilypolanco) · GitHub: [github.com/ErzaScarletTitania](https://github.com/ErzaScarletTitania)

### PROFESSIONAL SUMMARY

---

ISTQB-certified quality leader with 9 years building QA strategy and delivery discipline across 30+ web, mobile, desktop, and software-delivery products.

- **Quality systems:** Risk-based test strategy, release-readiness gates, and defect-prevention practices that reduced post-release defects by 20% across a 30+ product portfolio.
- **Delivery leadership:** QA Lead at ecoPortal (New Zealand) leading a 6-person team across 9 product squads, alongside a contract Project Manager & QA Lead engagement covering planning, risk tracking, escalation design, and stakeholder reporting.
- **AI-enabled execution:** Evidence-first, AI-assisted workflows that make testing, reporting, and coordination more structured, auditable, and efficient.
- **Global remote:** Bilingual (English C1 / Spanish native), based in Lima, Peru (UTC-5) with full overlap with US business hours, working with distributed international software teams.

### CORE COMPETENCIES

---

Quality Engineering Management · QA Strategy · Release Readiness · Risk-Based Testing · Defect Prevention · Quality Metrics · Incident Escalation Design · Cross-Functional Delivery · Stakeholder Reporting · AI-Enabled Workflow Design · Evidence-Based QA · Distributed Team Leadership · Process Improvement · ISTQB / Scrum / CMMI

### PROFESSIONAL EXPERIENCE

---

#### ECOPORTAL — Remote (Lima, Peru · New Zealand)

*QA Lead | Jul 2026 – Present*

- **Led a 6-person QA team supporting all 9 active product squads**, owning department strategy, testing standards, and QA representation with engineering and executive stakeholders.
- **Delivered the department's first documented QA status assessment within 2 weeks of joining** — a handover that came with no transition documentation — by running 14 structured interviews across 5 stakeholder groups, surfacing people, process, and coverage risks that had never been captured.
- **Set the technical direction for QA automation and AI-assisted testing across the 9-squad platform** by cloning, running, and auditing the product locally to pinpoint system- and API-level coverage as the highest-risk gap, then shaping the Playwright and Claude-based roadmap that extends the team beyond frontend-only E2E testing.
- **Translated the diagnosis into a prioritized short-term remediation plan for the CTO and Chief Strategy & Product Officer**, sequencing immediate quality fixes ahead of the longer structural roadmap while preserving the department's mid-term direction.

#### CUBAN ENGINEER — Remote (Lima, Peru) · Contract

*Project Manager & QA Lead (Contract) | Sep 2025 – Present*

- **Led delivery for a top-priority software program** by coordinating a cross-functional team of 3 engineers, managing planning and risk tracking across a multi-stream software roadmap.
- **Reduced high-impact incident resolution time by 40%** by designing and implementing a tiered escalation framework with clearer severity, ownership, and SLA discipline.
- **Increased on-time deliverable approval to 90%** by introducing milestone demos and tighter stakeholder feedback loops across delivery checkpoints.
- **Standardized weekly financial and burn-rate reporting across every delivery milestone**, giving stakeholders a single view of spend versus progress and eliminating ad-hoc budget status requests.

- **Strengthened execution discipline and team accountability** by introducing clearer goals, ownership expectations, and more measurable delivery tracking.

#### **CUBAN ENGINEER — Remote (Havana, Cuba)**

*QA Lead | Sep 2021 – Aug 2025*

- **Defined a unified QA strategy across 30+ products**, aligning practices with ISTQB, Scrum, and CMMI and establishing a consistent quality baseline across web, mobile, and desktop products.
- **Reduced post-release defects by 20% across a 30+ product portfolio** by leading risk-based test planning, prioritized regression, and stronger release-gate reviews.
- **Increased pre-UAT defect detection to 60%** by designing cross-platform black-box, exploratory, and risk-based testing across 10+ .NET 8 desktop apps, 5 Flutter mobile apps, and 7 websites.
- **Cut manual regression effort by ~30% per release cycle** by improving regression coverage and evidence-based QA workflows across 3 production websites.
- **Improved QA team consistency and handoff quality** by mentoring analysts in test design, evidence quality, and stronger defect reporting standards.

#### **UNIVERSIDAD DE CIENCIAS INFORMATICAS (UCI) — Mariel, Cuba**

*B2B Sales Representative | Sep 2020 – Aug 2021*

- **Generated 15 B2B contracts supporting \$1.5M+ in annual revenue** by leading account development in Cuba's Mariel Special Economic Zone.
- **Sustained 90% client retention across 100+ accounts** through structured follow-up and executive-facing relationship management.

#### **UNIVERSIDAD DE CIENCIAS INFORMATICAS (UCI) — Havana, Cuba**

*Technical Sales Specialist | Apr 2019 – Aug 2020*

- **Owned technical discovery and customer-facing solution alignment** contributing to a 95% customer satisfaction score.
- **Accelerated solution-delivery cycles by 30%** by aligning sales, engineering, and marketing around a clearer discovery-to-handoff model.
- **Reduced complex-issue resolution time by 40%** by coordinating faster cross-functional response on escalations.

#### **UNIVERSIDAD DE CIENCIAS INFORMATICAS (UCI) — Havana, Cuba**

*University Lecturer (Part-Time) | Sep 2017 – Aug 2021*

- **Taught 100+ undergraduates in Discrete Mathematics, Probability, and Statistics** while redesigning course materials and delivering additional mastery-focused support sessions.
- **Improved cohort promotion rates by 15%** through stronger teaching materials and targeted reinforcement sessions.

#### **UNIVERSIDAD DE CIENCIAS INFORMATICAS (UCI) — Havana, Cuba**

*SEO Specialist | Sep 2017 – Mar 2019*

- **Improved search visibility across 600+ websites** by executing 2,000+ technical SEO audits at scale.
- **Contributed to SEOWebMas, a national diagnostic tool** supporting technical SEO assessment for Cuban government websites.

#### **SELECTED PROJECTS**

---

- **G-Connect Testing Agent v2** — Designed a structured operating model for AI-assisted QA with phased execution, persistent session state, and machine-readable reporting that supports evidence-first delivery. ([github.com/ErzaScarletTitania/g-connect-testing-agent-v2-public-showcase](https://github.com/ErzaScarletTitania/g-connect-testing-agent-v2-public-showcase))

- **MS Graph Auth** — Turned a blocked enterprise access problem into a usable Microsoft Graph workflow, creating a reusable CLI path for shared OneDrive and SharePoint automation under tenant constraints. ([github.com/ErzaScarletTitania/ms-graph-auth](https://github.com/ErzaScarletTitania/ms-graph-auth))
- **Spec-Driven Delivery Template** — Created a reusable template for turning product ideas into specs, implementation milestones, and validated deliverables with clearer traceability between requirements and execution. ([github.com/ErzaScarletTitania/spec-driven-delivery-template](https://github.com/ErzaScarletTitania/spec-driven-delivery-template))
- **Codex CLI Accounts Selection** — Designed a Windows-first account-isolation workflow for Codex CLI, improving repeatability and reducing friction for multi-account use. ([github.com/ErzaScarletTitania/Codex-CLI-Accounts-Selection](https://github.com/ErzaScarletTitania/Codex-CLI-Accounts-Selection))

## TOOLS & WORKING METHODS

---

QA & testing context: Manual & Exploratory Testing · Risk-Based Testing · Cross-Browser Testing · Playwright · Selenium WebDriver · Postman | Workflow design: GitHub Copilot · OpenAI Codex · Claude · Multi-agent systems | Delivery & platforms: GitHub Actions · Azure DevOps · .NET 8 · Flutter · Python · PowerShell · C# · SQL · Windows CLI | Evidence: OpenCV / OpenCvSharp · Evidence-first reporting

## EDUCATION

---

Engineer in Computer Science (B.E. equivalent) — Universidad de las Ciencias Informáticas (UCI), Havana, Cuba | 2012 – 2017

- "Rubén Martínez Villena" — top graduate honor.

## CERTIFICATIONS & LANGUAGES

---

- **ISTQB Certified Tester — Foundation Level** (CTFL) · EFSET English C1 (70/100) · IELTS General Training B2 (Band 7.0) English — Professional Working (C1) · Spanish — Native · German — Beginner (A1)
