

LILIET DE LA CARIDAD GONZALEZ POLANCO

Senior QA Manager | Test Automation Lead | AI-Enabled Quality Engineering

Lima, Peru (Remote · Full Overlap with EST / CST) · +51 944 537 419 · liliet.polanco.peru@gmail.com

LinkedIn: [linkedin.com/in/lilypolanco](https://www.linkedin.com/in/lilypolanco) · GitHub: github.com/ErzaScarletTitania · Available via B2B / Deel / Payoneer

PROFESSIONAL SUMMARY

ISTQB-certified QA Manager and Test Automation Lead with 8+ years scaling quality engineering across 20+ web, mobile, desktop, and API products. Proven record cutting post-release defects by 20% and high-impact incident resolution time by 40% while leading distributed QA and delivery teams. Builds AI-enabled QA tooling — multi-agent testing frameworks, OpenCV evidence pipelines, and Copilot/Codex-assisted workflows — that compress regression cycles and produce auditable, delivery-ready reporting. Bilingual (EN C1 / ES Native), based in Lima, Peru with full overlap on US EST and CST time zones. Available for US remote and contract engagements via B2B, Deel, or Payoneer.

CORE COMPETENCIES

Test Strategy & Planning · Risk-Based Testing · Test Automation (Selenium WebDriver, Postman / Newman) · API & Integration Testing · Manual & Exploratory Testing · Regression & Cross-Browser Testing · Performance Testing · Mobile QA (Flutter, iOS / Android) · Desktop QA (.NET 8) · Release Readiness & Quality Gates · Defect Management & Triage · CI/CD (GitHub Actions, Azure DevOps) · AI-Enabled QA (Copilot, Codex, Multi-Agent Workflows, OpenCV Evidence Capture) · Process Improvement (ISTQB, Scrum, CMMI) · Distributed Team Leadership · Stakeholder Management · KPI & Quality Metrics Reporting · Mentorship · Cross-Functional Execution

PROFESSIONAL EXPERIENCE

CUBAN ENGINEER — Remote (Lima, Peru — serving LATAM / US)

Project Manager | Sep 2025 – Present

- Drive delivery of one of the company's top-priority software programs by leading a cross-functional team of 3 engineers, owning sprint planning, risk tracking, and stakeholder reporting across a multi-stream roadmap.
- Cut high-impact incident resolution time by 40% by designing and rolling out a tiered escalation framework that clarified severity, ownership, and SLA targets for production issues.
- Lifted on-time deliverable approval rate to 90% by instituting continuous stakeholder feedback loops and milestone demos that surfaced misalignment earlier in the delivery cycle.
- Increased budget transparency and stakeholder confidence by 10% by standardizing weekly financial and burn-rate reporting tied to delivery milestones.
- Strengthened team accountability by introducing structured, OKR-style goal-setting tied to measurable business outcomes.

CUBAN ENGINEER — Remote (Havana, Cuba)

QA Lead | Sep 2021 – Aug 2025

- Defined and scaled a unified QA strategy across 20+ web, mobile, desktop, and API products by aligning practices with ISTQB, Scrum, and CMMI standards — establishing the company's quality baseline.
- Reduced post-release defects by 20% across the portfolio by leading a 3-person QA team in risk-based test planning, prioritized regression, and release-gate reviews.
- Cut manual regression effort on 3 production websites by owning end-to-end test automation with Selenium WebDriver, and strengthened API contract coverage with Postman / Newman collections.
- Raised early-stage defect detection so 60% of bugs were caught before UAT by executing black-box, cross-browser, performance, and exploratory testing across 10+ .NET 8 desktop apps, 5 Flutter mobile apps, and 7 websites.
- Mentored QA analysts on test design, defect reporting, and evidence-based QA, improving team output consistency and reducing escaped-defect re-test cycles.

UNIVERSIDAD DE CIENCIAS INFORMATICAS (UCI) — Mariel, Cuba

B2B Sales Representative | Sep 2020 – Aug 2021

- Generated 15 new B2B technology contracts and supported \$1.5M+ in annual revenue by leading account development across Cuba's flagship Special Economic Zone (Mariel).
- Sustained a 90% client retention rate across a 100+ account portfolio through structured follow-up cadences and tailored executive engagement.

UNIVERSIDAD DE CIENCIAS INFORMATICAS (UCI) — Havana, Cuba

Technical Sales Specialist | Apr 2019 – Aug 2020

- Reached a 95% customer-satisfaction score by owning end-to-end technical engagement on high-impact accounts and translating customer needs into actionable solution requirements.
- Accelerated solution-delivery cycles by 30% by aligning sales, engineering, and marketing on a shared discovery-to-handoff playbook.
- Cut complex-issue resolution time by 40% by taking ownership of escalations and coordinating cross-functional response.

UNIVERSIDAD DE CIENCIAS INFORMATICAS (UCI) — Havana, Cuba

University Lecturer (Part-Time) | Sep 2017 – Aug 2021

- Taught 100+ undergraduates Discrete Mathematics, Probability, and Statistics and raised cohort promotion rates by 15% with redesigned materials and 20+ supplementary mastery sessions.

UNIVERSIDAD DE CIENCIAS INFORMATICAS (UCI) — Havana, Cuba

SEO Specialist | Sep 2017 – Mar 2019

- Improved search visibility for 600+ websites by executing 2,000+ technical SEO audits and contributing to SEOWebMas, a national tool adopted to assess Cuban government sites.

SELECTED AI & AUTOMATION PROJECTS

- G-Connect Testing Agent (v2 — Public Showcase): Multi-agent testing framework with structured execution phases, persistent session state, and machine-readable reporting artifacts — demonstrates production-style AI-assisted QA delivery patterns. (github.com/ErzaScarletTitania/g-connect-testing-agent-v2-public-showcase)
- G-Connect Frame Extractor (OpenCV / C#): Built a C# + OpenCvSharp utility that extracts timestamped PNG evidence frames from recorded test-session videos, cutting manual evidence-capture effort for QA reports. (github.com/ErzaScarletTitania/g-connect-frame-extractor-opencv)
- G-Connect Frame Extractor (PowerShell): Lightweight PowerShell counterpart for fast, on-demand evidence capture from session recordings. (github.com/ErzaScarletTitania/g-connect-frame-extractor-ps1)
- Codex CLI Accounts Selection: Windows launcher for isolated Codex CLI account profiles with reliable setup and tested startup flows, enabling safer multi-account AI developer workflows. (github.com/ErzaScarletTitania/Codex-CLI-Accounts-Selection)
- Internal — Invoice Automation: Local-first tooling that transforms monthly Excel reporting into Google Sheets invoices, validation logs, and exportable PDF deliverables.
- Internal — Azure DevOps Export Tooling: Converts work items into reusable JSON, attachment bundles, and readable Markdown reports for downstream triage.

EDUCATION

Universidad de las Ciencias Informáticas (UCI), Havana, Cuba — Engineer in Computer Science (B.E. equivalent) | Sep 2012 – Jun 2017

- Honor: "Rubén Martínez Villena" award — Faculty 2 top graduate of the cohort.

CERTIFICATIONS

- ISTQB® Certified Tester — Foundation Level (CTFL), International Software Testing Qualifications Board (2022)
- EFSET English Certificate — C1 Advanced (70/100)
- IELTS General Training — CEFR B2 (Band 7.0)

LANGUAGES

English — Professional Working (C1) · Spanish — Native · German — Beginner (A1)
